Introductory

Dahlias are Autumn's most beautiful flowers and are getting more popular each year, lasting until frost. They are not particular as to the soil or location. Although maximum growth and bloom reward the full sun, some of the stronger sorts develop most perfect specimens in partial shade; and localities with a moist atmosphere or dewy nights are apt to give better results than a drier air. Frequent cultivation prior to their blooming season is absolutely essential to real success. Time for planting varies according to climate, but is safe after all danger of late frosts is past. Roots should be planted about 4 inches deep, laid flat, eyes or sprout up. When cultivating hill slightly.

Guarantee—All guaranteed true to name or we will replace them, but we are not responsible for more than purchase price. Our roots are strong divisions of field grown roots and with proper care will give wonderful results.

Green Plants—From better varieties will be ready for shipment after May 15th or when danger of frost is past and can be set out as late as July and have wonderful blooms. These plants are strong and well-rooted, hardened off to keep right on growing and should be planted 2 inches deeper than pot level. They not only produce wonderful flowers the first year, some times the best exhibition blooms, but enables you to get the best high priced varieties at a great saving.

Order Early—Early orders are solicited to prevent disappointment in case our stock of selected varieties has been depleted. We do not substitute unless requested to do so. Money will be refunded if stock is exhausted.

Delivery—Roots will be delivered from May 1st to June 15th unless otherwise requested. Please state by what method you want tubers forwarded.

Terms—Cash with order or 25 per cent of amount with order and balance at time of delivery. 10% additional stock may be selected on all retail orders from \$5.00 to \$10.00. 20% additional stock on retail orders over \$10.00. Residents of Ohio must include three per cent sales tax with their remittance.

Flower-lovers are welcome at all times to visit our garden and see the flowers in bloom, such as they expect to raise from plants and roots purchased from us.
